LB 73A

SENATOR GOODRICH: It is because of the fact we have...let me step back a step. Ordinarily when you introduce a bill that calls for some activity, then if that activity is going to cost the department over \$5,000 you wind up having to...by the rules we have to introduce an A bill to go along with it. That is all standard procedure. Once in awhile you will discover that they don't need the A bill and the standard procedure that is followed isn't necessary so what we did is we killed the first two. These are the two bills that..the two A bills that I went ahead and signed because of standard procedure. We found out we didn't need them so I just moved to kill them. Now I could have had them withdrawn but that would have laid them over until tomorrow and we would have had to do it again tomorrow. So I just moved to kill them.

SENATOR HIGGINS: But they don't have anything to do with LB 134? I thought I heard you say something about LB 134, if it passed or something.

SENATOR GOODRICH: Offhand, Marge, I can't even remember what 134 (interruption)...

SENATOR HIGGINS: Okay, that is what I was getting confused. I thought what has 134 have to do with killing these bills.

SENATOR GOODRICH: Nothing to do with that at all.

SENATOR HIGGINS: Okay, thank you.

SPEAKER NICHOL: Senator Jacobson, did you wish to speak?

SENATOR JACOBSON: Mr. President, on 73A, the bill hasn't been discussed yet so we don't know the fiscal impact that could be or could not be. The bill is up for discussion today and it could have no fiscal impact, depends on whether the bill is amended or not.

SPEAKER NICHOL: 73 is on Select File and 73A is a new bill that must catch up with 73 so we are just talking about 73A at the moment. Senator Schmit doesn't seem to be here. Senator Lamb, were you supposed to handle this, 73A? Senator Warner, were you prepared to handle this?

SENATOR WARNER: I will move the bill be advanced, and if... again under the rule, the A bill reflects how the bill was amended on to Select File. If it gets amended...off of General File, if it gets amended again where it is not needed, why then, of course, it can be not used but it ought to be advanced so it doesn't inadvertently hold up LB 73 on Select File which otherwise it does. I would move the bill be advanced.
